GOEL TMT

The Environment (Protection) Rules, 1986

(FORM – V)

(See rule 14)

Environmental Statement for the financial year ending the 31st March, 2026

PART – A

(i) Name and address of the Nominated owner of the industry operation or process. : Shri Suresh Agrwal
Shri Bajrang Iron Ore Mines
(Lessee Shri Bajrang Power & Ispat Ltd.),
Address: Forest Compartment No.-641 & 642
Near Village - Hahaladdi & Chachad
Forest Division- Bhanupratappur
(East) Tehsil – Durgukondal
District –Uttar Baster, Kanker (C.G.)

(ii) Industry category Primary – : Secondary
(STC code Secondary – (SIC Code)

(iii) Production Capacity – Units -

Iron Ore : 1.2 MTPA

(iv) Year of establishment : 1st CTE-17.12.2014
(Amended CTE Cum CTO- 01.03.2018
& 09.07.2020)

(v) Date of the last environmental Statement submitted. : 19.09.2025

PART – B

Water and Raw Material Consumption

(1) Water consumption m^3 / d:

Mine : 83 KLD
Domestic : 17 KLD
Green Belt : 20 KLD

Name of Products:	Process water consumption per unit of product Output	
	During the Previous Financial year 2024-25	During the Current Financial year 2025-26
1. Iron Ore	83 KLD	83 KLD

(II) Raw Material Consumption -

Name of raw material	- Raw Material consumption quantity	
	During the previous Financial year 2024-25	During the Current financial year 2025-26

Not Applicable. As it is Iron Ore Mining Operation Unit.

*Industry may use codes if disclosing details of raw material would violate contractual obligations, otherwise all industries have to name the raw materials used.

PART – C

Pollution discharged to environment/unit of output

(Parameter as specified in the consent issued)

Pollutants	Quantity of pollutants Discharged (mass/day)	Concentrations of pollutants in discharges (mass/volume)	Percentage of variation from prescribed standards with reasons
(a) Water	No disposal of polluted water outside the Mine area. Domestic discharge water after treatment is being used for plantation purpose.		
(b) Air	Dust generation during crushing process, loading and unloading of materials & solid wastes, is being controlled by regular water sprinkling by mist water spray system and sprinklers and adopting good housekeeping practices and maintaining emission well within the prescribed norms.		

PART – D

HAZARDOUS WASTES

(As specified under Hazardous Wastes/Management and Handling Rules, 1989)

Hazardous Waste	Total Quantity (Kg)	
	During the previous Financial year 2024-25	During the Current Financial year 2025-26
(a) From Process - Used Oil	0.470 KL	0.62 KL
(b) From pollution control facilities	No generation of Hazardous waste	

Sold & Recycle

Used Oil - 0.200 KL Utilized in House

PART – E

Solid Waste

Total Quantity (Kg)

	During the previous Financial year 2024-25	During the Current Financial Year 2025-26
(a) Overburden	1616295 MT	2148960.1 MT

PART – F

Please specify the characterization (in terms of composition of quantum) of hazardous as well as solid wastes and indicate disposal practice adopted for both these categories of wastes.

Hazardous waste – Generated used /spent oil is being stored in MS drum of 200 Ltr capacity under covered shed at designated storage area and being used for lubrication in Roller and Belt Conveyors and its balance being sold to authorized agencies.

Solid Waste - Overburden–It is being kept in stock yard with proper protective measures as per MoEF/Mining Plan norms within the mining premises.

PART – G

Impact of the pollution abatement measures taken on conservation of natural resources and the cost of production.

Captive consumption of Iron Ore in our SBPIL Borjhara & Tilda units.

PART – H

Additional measures/investment proposal for environment protection including abatement of Pollution, prevention of pollution.

Road Construction inside the mines Premises, Regular water sprinkling on these Roads & Mining areas for dust suppression, Solid waste Management, Extensive Tree Plantation, installed 3 Nos. Online Ambient Air Quality Monitoring Systems, at Mine area for monitoring of Ambient Air quality and taking corrective action accordingly, construction of rain water harvesting pits within the mine premises.

PART – I

Any other particulars for improving the quality of the environment.

100% utilization of solid wastes/overburden so as to ensure that no disposal of solid waste from mine to outside.
